

TEACHER'S MANUAL

Find the stack of paper labeled "Teacher's Manual". Remove the band, and insert the pages of the Teacher's Manual into the three ring binder with "Teacher's Manual" on the cover.

Repair instructions:

If the the holes punched in the manual's pages become torn or worn, use the gummed hole reinforcers provided with the kit to repair the damage. Another alternative is to replace the damage page with a photo-copy. Should the binder become damaged you may replace it with any standard two inch, three ring binder.
