

MAKING SOUND REVIEW FLIP BOOKS

Find the component labeled Sound Review Flip Books. When you have completed making this component there will be five Sound Review Flip Books. Each book is identified by a different geometric shape, (triangle, circle, square, rectangle, and star). When cutting the component's pages, be careful to note that the pages are not all the same length.

ASSEMBLY INSTRUCTIONS

1. Cut out the pages of the triangle book.
2. Reinforce the pre-drilled holes with self-sticking gummed reinforcers (contained in the kit). It is best to apply the reinforcers to the back of each page rather than the front.
3. Arrange the pages in order. The longest page of each book is the last page. The pages become progressively shorter until the first page is reached.
4. Insert the pages into the 3/4 inch rings provided.
5. Repeat the process for each book.
