

MAKING TWO AND THREE-SOUND FLIP BOOKS

Find the component labeled Two Sound Flip Book (63 sheets 8 1/2 x 11). The pages of the book are numbered so that a word and a picture have the same page number. These numbers are in the upper left hand corner of each half sheet. Use them as guide when assembling the book.

ASSEMBLY INSTRUCTIONS

1. Cut the pages in half as indicated by the cut lines. Put the words (the page printed in black and white) on top of the pictures (printed in color).
2. Assemble the book so that the words are on top of pictures with the matching page numbers. Word one is on top of picture one, word two is on top of picture two, and so on. Follow this pattern all the rest of the pages in the book. Assemble the book in order on the large rings (two inch included in the kit). Page one is on top and page sixty-three on the bottom.
3. Find the component labeled Three-Sound Flip Book (63 sheets 8 1/2 x 11). Repeat the process outlined above to make the Three-sound Flip Book.
